NURSE CALL SOLUTIONS

Welcome,

Nurse Call Solutions have been established for over 20 years and operate in the Nursing and Residential Care Sector throughout the UK. We provide a breadth of solutions in Nursing Home security and safety products as well as specialising in fall management and prevention.

Fall Monitoring

Nurse Call Solutions provide a range of fall sensors and monitors aimed at reducing risks associated with wandering patients or residents in nursing and care homes. Our range includes devices that utilise infra red technology to detect movement as well as bespoke options that can be tailored to an individual's needs.

Wander Mats

A simple solution to wandering in care homes. We offer standard and heavy duty mats to suit all Nurse Call Systems.

Companion Mini

The smallest epilepsy monitor available. Used in the detection of tonic-clonic seizures, our intelligent monitor will only alert during spasm induced bed movements.

Connect Fall Monitor

A full circle solution monitor that is compatible with a wide range of call systems and pressure mats. It also features an optional pullcord.

Infra Red Monitor

This monitor can be mounted on a door or patient's bedside to trigger an alert when a person breaks the infra-red beam by exiting bed.

Epilepsy Care

A range of products which are programmed to a patient's individual needs. Our Epilepsy Monitors detect spasm induced bed activity, whilst our personal alarm systems assist individuals with increased independence and security. In the UK, 600,000 people live with epilepsy and it is estimated that 5 out of 100 people will experience a seizure at some point in their life. Talk to our client services team for further information on our solutions.

Nurse Call Accessories

We provide a range of Nurse Call Accessories and spare parts for those looking to maintain, replace and extend their Nurse Call products. Our variety of Pear Push Leads are available for connection to any existing Nurse Call System, allowing patients to make calls through the facilities main system from their chair or bed. Nurse Call Solutions can provide custom fitments to assist with adding and setting up multiple accessories to a single call point, keeping your systems simple and easy to use.

SAS Push to Call Lead

Featuring a linen clip, the Pear Push Lead is compatible with Gemini and Network I & II Nurse Call Systems. Available with a flexible 2.5m lead.

Mono Pear Push Lead

Compatible with Call Systems that support a mono fitment, our lead provides one level of call and is available with 2 or 4 meter lead.

Nurse Call Infra Red Trigger

Ideal for patient common rooms, allowing individuals to access the trigger for assistance as required. Compatible with 600/700 Intercall.

everyone
in mind.

Personal Fall Alarms

Nurse Call Solutions patient or resident transmitters and receivers can be purchased individually or as part of a package. Both wrist and neck pendant options are available for the comfort and preference of each individual. We can provide assistance and further details on product set up as required.

Emergency Neck & Wrist Pendant

A wireless transmitter designed for emergency and remote control applications. Packages include receivers and wrist worn options.
